SUMMARY

Nearly twenty years in software, full-stack early, seven in front-end architecture, the last two leading the engineering group behind BSPK, Anywhere Real Estate's design system and its first open-source project. Design-trained, so accessibility and performance are requirements rather than cleanup. I build with AI tools daily, and systems those tools can see. U.S. Army veteran.

SKILLS

Frameworks	React · Angular · React Native · Vite · Tailwind CSS
Languages	TypeScript · JavaScript · CSS/SCSS · GraphQL · Node.js
Systems	Design systems · Component libraries · Design tokens · Accessibility (WCAG) · Performance
Practice	Figma plugin development · CI/CD and release automation · AI-assisted development (Claude Code, Copilot, Cursor) · Mentorship

EXPERIENCE

Senior Software Engineer / Front-End Architect

Oct 2024 – Present

Compass, formerly Anywhere Real Estate · Real estate · Remote

- Built BSPK, Anywhere's design system, from zero as its only engineer, then led a team of three to 86 React components, 10 brand themes and 62 releases.
- Built the Figma plugin that syncs 2,000+ design tokens into per-brand stylesheets, with a build check that fails on any unknown token.
- Ported BSPK to Angular with AI coding tools: 88 components on the same stylesheets, rendering the same DOM for assistive technology.
- Built the docs site from BSPK's own components, with axe-core on every live example, so accessibility checks outlived the team's dedicated reviewer.
- Made BSPK the company's first open-source project; teams were still shipping on it and requesting upgrades after the funded work ended.

Senior Software Engineer / Front-End Lead

Sep 2021 – Oct 2024

Butterfly Network, Inc. · Medical imaging · Remote

- Led the shared React component library behind Butterfly's cloud platform, where clinicians store and review scans from its handheld ultrasound devices.
- Ran the team's process as Certified ScrumMaster, cutting defects and rework through tighter acceptance criteria and front-end testing.
- Partnered with product and design to turn business requirements into technical specifications and well-scoped stories.

EXPERIENCE CONTINUED

Senior Software Engineer (Frontend Focused)
Jul 2019 – Sep 2021

CoStar Group · Commercial real estate data · Richmond, VA

- Rearchitected a large shared React UI library used across multiple business units for long-term maintainability.
- Owned component API design and documentation patterns, setting standards for reusability, accessibility, and performance across desktop and mobile web.

Engineer Advisor / React Native Architect
Feb 2019 – Jul 2019

Anthem, Inc. · Healthcare (payer) · Norfolk, VA · Unified several teams on one React Native architecture with reusable cross-platform component patterns.

Senior Application Engineer (Frontend Focused)
Oct 2017 – Feb 2019

ADP · HR and payroll · Norfolk, VA · Set front-end quality standards through code review and shaped architecture decisions with product and UX while modernizing legacy code.

Software Developer
Feb 2015 – Oct 2017

Array Digital, formerly 80/20 Software Consulting · Software consulting · Chesapeake, VA · React and Angular apps for finance clients on Node.js, PHP, and ASP.NET.

Software Engineer II
Jul 2009 – Feb 2015

City of Virginia Beach · Local government · Virginia Beach, VA · Public-facing web apps and custom mapping tools (Google Maps, ESRI APIs).

Web, Graphic, and Print Designer
2004 – 2008

Alutiiq · Design-trained foundation: brand, print, and a custom PHP/MySQL CMS

MILITARY SERVICE

United States Army
2000 – 2004

Transportation Management Coordinator (88N), Fort Bragg, NC · Led logistics across multiple deployments; served as Ground Liaison Officer to the Air Operations Center, a role normally held by commissioned officers.

VOLUNTEER

Emergency Medical Technician
Sep 2022 – Nov 2024

Virginia Beach EMS · Patient assessment and emergency care in transport

CERTIFICATIONS

Certified ScrumMaster (CSM)
2021

Scrum Alliance

NREMT EMT-Specialist
2023

National Registry of Emergency Medical Technicians
