

Brian S. Reed

Design Systems Engineer · Front-End Architect

Chesapeake, VA (Remote) · me@iambrian.com · (757) 447-4777

iambrian.com · linkedin.com/in/iambriansreed · github.com/iambriansreed

SUMMARY Nearly twenty years in software, full-stack early, seven in front-end architecture, the last two leading the engineering group behind BSPK, Anywhere Real Estate's design system and its first open-source project. Design-trained, so accessibility and performance are requirements rather than cleanup. U.S. Army veteran.

SKILLS	Frameworks	React · Angular · React Native · Vite · Tailwind CSS
	Languages	TypeScript · JavaScript · CSS/SCSS · GraphQL · Node.js
	Systems	Design systems · Component libraries · Design tokens · Accessibility (WCAG) · Performance
	Practice	Figma plugin development · CI/CD and release automation · AI-assisted development (Claude Code, Copilot, Cursor) · Mentorship

EXPERIENCE **Senior Software Engineer / Front-End Architect** Oct 2024 – Present
Anywhere Real Estate · Remote

- Built Anywhere's design system, BSPK, from zero as its only engineer, then led a team of three to 86 React components, an Angular library and 10 brand themes over 62 releases.
- Built the Figma plugin that syncs 2,000+ design tokens into per-brand stylesheets, with a build check that fails on any unknown token.
- Built the docs site from BSPK's own components, with axe-core on every live example, so accessibility checks outlived the team's dedicated reviewer.
- Made BSPK the company's first open-source project; teams were still shipping on it and requesting upgrades after the funded work ended.

Senior Software Engineer / Front-End Lead Sep 2021 – Oct 2024
Butterfly Network, Inc. · Remote

- Ran the team's process as Certified ScrumMaster, cutting defects and rework through tighter acceptance criteria and front-end testing.
- Led the shared React component library behind a cloud-based enterprise SaaS platform.
- Partnered with product and design to turn business requirements into technical specifications and well-scoped stories.

EXPERIENCE CONTINUED	Senior Software Engineer (Frontend Focused) CoStar Group · Richmond, VA – Rearchitected a large shared React UI library used across multiple business units for long-term maintainability. – Owned component API design and documentation patterns, setting standards for reusability, accessibility, and performance across desktop and mobile web.	Jul 2019 – Sep 2021
	Engineer Advisor / React Native Architect Anthem, Inc. · Norfolk, VA · Unified several teams on one React Native architecture with reusable cross-platform component patterns.	Feb 2019 – Jul 2019
	Senior Application Engineer (Frontend Focused) ADP · Norfolk, VA · Set front-end quality standards through code review and shaped architecture decisions with product and UX while modernizing legacy code.	Oct 2017 – Feb 2019
	Software Developer 80/20 Software Consulting · Array Digital, LLC · Virginia Beach, VA · React and Angular apps for finance clients on Node.js, PHP, and ASP.NET.	Feb 2015 – Oct 2017
	Software Engineer II City of Virginia Beach · Virginia Beach, VA · Public-facing web apps and custom mapping tools (Google Maps, ESRI APIs).	Jul 2009 – Feb 2015
	Web, Graphic, and Print Designer Alutiiq · Design-trained foundation: brand, print, and a custom PHP/MySQL CMS	2004 – 2008
MILITARY SERVICE	United States Army Transportation Management Coordinator (88N), Fort Bragg, NC · Led logistics across multiple deployments; served as Ground Liaison Officer to the Air Operations Center, a role normally held by commissioned officers.	2000 – 2004
VOLUNTEER	Emergency Medical Technician Virginia Beach EMS · Patient assessment and emergency care in transport	Sep 2022 – Nov 2024
CERTIFICATIONS	Certified ScrumMaster (CSM) Scrum Alliance	2021
	NREMT EMT-Specialist National Registry of Emergency Medical Technicians	2023
